## What would you do if your salad bit you back or started to talk?

This multimedia exhibit about the role of plants in science fiction literature and film invites you to engage in exactly this thought experiment. Conceptualized by a team of graduate students led by Katharina Scheerer and Christina Becher at the University of Münster in Germany, this exhibit features killer plants from outer space and utopian gardens of the future through poems, (graphic) novels, and films with plant protagonists. Shown across two spaces on the University of Arizona campus and accompanied by a series of events:

### OCT 4–DEC 22 POETRY CENTER EXHIBIT

1508 E Helen St | Tue-Fri 9AM–5PM, Sat 9AM–3PM

### OCT 28–DEC 9 TREE RING LAB EXHIBIT
